

I think that it's important that we keep these recommendations focused on what was requested by WPIC. To that end, I suggest that the last sentence of the third paragraph should be amended to read: "Those comments and issues are also included below but were not discussed as part of this project."

I also suggest that we clearly identify those recommendations that were on point and part of the discussion last week and other issues which were raised by different parties but were not related to water distribution and administration and were not discussed in any depth during the meeting. In other words, I would suggest that you include recommendations 1-7, 12, 14, 17 and 19 under "Water Distribution and Administration" and renumber those recommendations sequentially 1 – 11. I would also ask that you add a new Issue under Water Distribution and Administration issues along these lines: "Establish a pilot project as a means of testing what works and does not work in a single basin before revising the water commissioner distribution and enforcement statutes statewide" as issue 12.

If the off topic issues included in 10, 11, 13, 15, 16, and 18 are retained in this document, I recommend that they be included under a separate heading "Other Issues not related to Water Distribution and Administration" and be renumbered sequentially as 13 – 20 to alleviate any potential confusion.

Thanks,

Tim
